Silent Running Craig DiLouie

Lt. Charlie Harrison survived the horrors of Rabaul and the midnight battle with the Mizukaze. When he reports to Sabertooth at Pearl, he must contend with a crew that isn't quite welcoming and an officer protecting a dire secret.

While underway, the captain reveals the submarine's mission--travel to the Japanese-occupied Philippines, deliver supplies to the Filipino guerillas, and bring American refugees home.

When Sabertooth runs into Yosai, one of the big aircraft carriers that attacked Pearl Harbor, the mission changes. As disaster strikes, Charlie must take command and make the ultimate decision--get the refugees home, or risk everything on an all-or-nothing attack.

I read book one in this series in 2016. I enjoyed it. Finally, I am getting back to the series with book two. Crash Dive, book one, was my first experience with the author and I was impressed. This book only enhances my respect for the author's storytelling skills.

The book is well written and researched. The story is action packed. The characters are interesting and believable. The suspense builds as the submarine proceeds on its mission. If you enjoy a World War II submarine story, this book is for you.

I read this book as an audiobook downloaded from Audible. The book is five hours. R. C. Bray does an excellent job narrating the book. Bray is a stage actor and voice actor. He has won many Earphone Awards and has been nominated for the Audie Award.

A Great Book, a classic WWII sub story

This was a great book in my estimation, good characters development, great detail in boat handling, operation and of course a good plot. I loved it. This reminded me of the classic WWII books I read when I was young. Now I am moving on to the next book in this series.

Mike Nicholas says

Great read

I have always enjoyed anything to do with submarines. Back in the late 50's I was able to go on a overnight on a diesel sub. This story brought back memories of what it was like. Except without the war! The story kept me turning the pages. I hope that there will be more in this series.

James L. Goodloe says

Good story

I really enjoy military fiction. I particularly enjoy it when the author is able to bring the story alive in the reader's mind. Craig DiLouie accomplishes that in this series. I feel that I have gotten to know Charlie Harrison in a way that I care what happens to him. I also hope we have not seen the last of Braddock...even though I don't like him.

William Dorsey says

An exciting read.

RJ says

Review on book three Battle Stations to correspond with Omnibus 1-3 version.

Mike Whitehouse says**Charlie sinking Japs**

Picking up from where he left off in Crash Dive Charlie Harrison continues his naval career in a new boat with a new crew and he has to prove himself all over again, and he does it with style, looking forward to Battle Stations.

Gave it 4 stars. WWII Submarine navy story. If you like navy submarine battle stories this is a good one this is book two of a three book series. Will probably get the next one when I want a break from heavy'er reading

7\$MartyQ says**WOW!**

As a work of fiction, this is one of the best books I have have read. Except for Charlie Harrison's reconnaissance trip to the beach to make contact with the guerrilla forces, which couldn't happen in the real navy, the book was one I was unable to put down. I look forward to the next book in the series. As a destroyer veteran myself, I am very curious about what life was like on the boats of WWII.

GymGuy says

Better than the first in the series. I enjoyed Charlie a bit more. He is definitely maturing as a character. Short book with pretty good action. Only problem....ending 25% is pretty absurd and unrealistic, but fir a B-movie, I guess it is a fun read.

As I said in my review of Book 1, the first two Harry Homewood books in his series and then O God of Battles are more substantial.

Adam says

Great series and exceptional narration. The way the depth charges boat "screws: are narrated is incredible. Purchased this as part of an omnibus series, 1-3.

Jim says

Silent Running

It just gets better with each story. It Harrison is on a new sub and has to prove himself once more.

Hazel Bright says

Excellent suspense, varied and well-drawn characters, engaging start to finish.

Gilbert Hatfield says

This was an ok book but I was on the boats and there were a lot of things that were not correct but and distracted from a good story. If you have never been on a diesel boat then it would have been better reading.

Richard Hodgetts says

You can't keep a good man submerged!

A very ambitious but anxious US Navy Lt. In WWII deals with second rate equipment, third rate skippers as he attempts to do his duty . Oh yes, he leaves his girl as he departs & finds another in Japanese controlled Philippines. Will his risks ruin his career? Will he lose one or both girls? Will the torpedoes pose a threat to Japanese shipping? Gotta read this to find out. By the end of 1943 you may ask yourself: did we win this conflict or not?
