This book was alright but it has NOTHING on R.L Stine's " The Cheater" it seems that's was Diane Hoh was trying to copy off of R.L. Stine. Diane could have come up with something better, this book looked like it was written from the mind of a first grader.

This book was okay and kept me guessing but it wasn't the best. Some characters got on my nerves, the plot was sometimes weird and I didn't think it was necessary. Overall, it was a good one and I probably would read another book by Diane. I think this is a book everyone has to try out for themselves.
