When To Fear The Living B.L. Brunnemer
Please be advised: Possible Trigger Warning

Hi, I'm Alexis Delaney. I'm your average 17-year-old girl. Except I can see the dead. And talk to the dead and help them move on. So..okay, I'm not your average 17-year-old girl. Right now, the Veil is shut off, and the Way is closed. Which means the dead can't move on, so, they are camping out on my lawn. I'm trying to open the Way, juggle school and, well, deal with my feelings for two of my best friends. If that isn't enough, notes have been showing up in my locker since I got back from Christmas vacation. Things are getting creepier as time goes on. He's actually starting to scare me, to be honest. But with the guys, I'll be fine. They've got my back. No one is crazy enough to take on Zeke. Right?

I am so here for Zeke and Lexie becomg a thing.

Hayley-Marie Haynes-Ward says

Omg!!! Zeke I adore you! **SPOILERS**

I've followed this series from the first books release date, I can honestly say I've been on the edge of my seat with anticipation for this release.

I am not disappointed, I'm not sure how B.L.Brunnemer does it but she's excelled yet again. From the flow of writing to the heart rending emotion I felt every single high and low.

Lexie my heart breaks for you.

Miles, you total sweetie.

Asher, so very nearly there.

Cookie Monster, don't ever change.

Ethan, I'm so glad you opened up.

Zeke, Oh my days!! Riley knew all along.

I'm on tenterhooks for book 4 I neeee to know Lexie and Zeke can sort the trigger.

B.L.Brunnemer, I read all genres and devour literature at a rapid rate, you my lady have broke my heart and for that I thank you!

Melissa (Ever So Mela) says

3.5

This just keep getting better <3

Miles is my absolute favorite. Zeke and Asher are battling it out for second, and the twins so far haven't moved past third place.

Two reviews in the span of a week?

Anyways...this book.

With everything going on right now, it's difficult to get excited about anything, much less a book. But this one...when I saw it was available I was out of my mind. It came out so quick! I think I'm going to love (see: obsess over) this author.

This series has *everything* that I love. It has reverse harem. It has a kickass female who stands up for herself. It has ghosts and the supernatural. It has drama and love and fighting and music.

Ok, so let's get into it. *I'm so excited to talk about this.*

Alexis (Lexie) is dealing with her breakup with Dylan, the ghosts that plague her all the time, the drama with other girls, high school, and her boys that she is slowly realizing that she wants to be more than friends with. That's a lot. Now she is also getting love letters in her locker and texts from a Secret Admirer.

Lexie is working through all of her issues with a lot of dedication and patience. She is learning MMA so that she can hold her own and get strong. She is doing well in school and she has *finally* had a breakthrough with the Veil where she has to ferry the dead to the afterlife. Teenage Grim Reaper.

But then this Secret Admirer gets more aggressive. And Dylan keeps trying to reinsert himself in her life after he broke her heart. Her Uncle Rory has to work nights for a few weeks so Lexie is left to fend for herself. The guys try to do what they can to protect her from her deranged stalker but they, too, are just kids and there is only so much that they can do to help.

I don't want to give away too much.

This book is great because it shows everybody has weaknesses. Lexie is learning to fight but she isn't great. The boys are trying to protect her but they can't. Her uncle and the police department are trying to find her stalker but they can't. This book is about how people cannot be perfect and not everything is easily solved.

While this book has a huge fantasy element to it, there is also something incredibly realistic about this series. It's sort of heartbreakingly real.

And the stalking thing is disturbing in its realism. It hit hard for me. I was violently and aggressively stalked in high school and the guy never got in trouble for it. He would follow me home from school, call me all the time, follow me to soccer practice, threaten me, leave notes in my locker...we think he slashed my tires since they went flat and were found to have pencils broken off in them. He keyed my car and threw a desk at me. **Even in high school, this is a reality for some people.** The school didn't want to listen to me, like they did for Lexie. I was told that the guy liked me so I should take it as a compliment. I was told to just go out with him so he would leave me alone. I was called a drama queen and a bitch for denying him and turning to my guy friends (who eventually fell in love with me but that's a whole different problem) for protection. This shit is real and scary and this book captured how helpless you can feel in this situation.

I definitely related heavily to this book.

Gosh, this was supposed to be a lighthearted review but I guess it went in a different direction.

It takes on a lot of sensitive issues. It addresses how useless you can feel or how people will make it seem like problems are your fault.

But you know what?

Lexie is going to overcome all of this and that's why I love this series. She takes on her problems. She solves things herself and takes responsibility. Lexie is strong and powerful but still human. She fucks up. She has a dirty mouth. But she is still someone that is worth admiring and looking up to. It's a sign that you can have the world of shit thrown at you and still come out on the other side.

I love the message in this book. It isn't about love conquering all. It's about hard work, perseverance, and trusting your instincts. It's about being an empowered woman and having people respect you for that.

The guys are constantly saying how Lexie can defend herself and will let her do so but will also not hesitate to step in the second she needs them.

This is a good relationship. This is how things are supposed to work.

This book shows how mutually respectful and loving relationships are supposed to be and contrasts them with dysfunctional poisonous relationships. You choose your family and you should never feel guilty about getting rid of toxic people.

The reverse Harem seems to be a popular genre these days, I don't mind since I enjoy reading them. However, due to its popularity and lack of originality, it would seem 9 out of 10 series I am probably reading basically the same story. What could've differentiated this series from many others are perhaps the supernatural twist, unfortunately, the series did not build much on the paranormal aspect of the book, instead I am reading what I've been reading from just about every other RH series has, relationships dramas, and creepy stalker.

My main struggle of this series was, there isn't a clear theme or strong plot. I've categorized this series as Reverse Harem with a tiny touch of paranormal. I said tiny touch because it's lack of world building. So far we only know Lexi is a necromancer, which is an inherited curse that has been passed down to all of the female line, consequently no one has been able to survive passing their prime. And this is pretty much all of the learned about the paranormal background of the series. Very little to none was explored and developed in that aspect, thus not much to go on from here. As I was reading I found myself simply focusing on the relationship drama of the book, as it significantly overshadow the paranormal part of the story. However, since I do enjoy the Reverse Harem theme, I find myself enjoying reading the relationship building, which this series has a decent pace, compare to many other RH genre books I've read.

The main plot of this book is about Lexi's stalker, thought I would argue it should've been two stalkers that Lexi and her men would be dealing with. I thought the plot was somewhat weak and predictable, as in you know something bad was going to happen. I also felt the dialogues were full of profanity that was not well developed. I know we shouldn't judge anyone based on their speech, but it was really hard not to in this book. I also didn't enjoy that every guy, random and minor characters that I absolutely cannot keep up with was in love with Lexi, View Spoiler », by the midpoint of the book I can't tell you who was who.

I also wondered, when has stored your phone in your bras become a thing? In just about all the RH books I've read, just about all shared this particular feature, and for the life of me, I cannot understand why. Because I don't know about you, but my phone would not fit and situated in my bras. This isn't realistic at all, it just seems very strange.

Overall, I don't think this series is particularly unique compare to other Reverse Harem books on the market. It has a weak story plot, and lack of world building. However, if you do enjoy relationships dramas, you might still enjoy this book. If I continue reading this series, it wouldn't be for the story plot nor the supernatural aspect, it would be the romance relationship of multiple guys and one girl.

3.75... I'm finding each book gets better, but I still find how slow this series is ultimately frustrating and wish more was developed of the veil and her abilities. It's the characters that suck you in though and I have to keep reading for them, but it's somewhat reluctantly.

Zeke though... and Miles...

Ineffable Book Blog says

I never know where the story is headed when reading a work of B.L. Brunnemer, all I actually know is that she never leads the reader in the wrong direction. And the same held true throughout this novel. Once again I was wowed by just how vivid Brunnemer created her story, characters, and everything in between. I fell in love with this series during the first novel, How to Live With the Dead, and have only fallen more deeply with every novel after.

In this novel there is definitely more development between the characters and their relationships. The bonds grew tighter as I fell more in love with all of Lexie's best guys. How could any normal person choose between Miles and Zeke and Ash and Ethan and Isaac and even some other guys outside the main group. I mean, we all kind of want a friend like Jake right? But I mean, these characters were crafted so well that even with all of their differences, I still want her to end with every single one of them. I love their relationships and bonds, and how each action they take is for the best of the group and each other. I can't help get caught up in this series because these characters are so amazing and I love how the author created their stories to compliment each other and create a character that best suites Lexie and her past.

You really can't go wrong with this series because every moment was crafted to surprise the reader and lead the story in a direction that's unexpected and yet better than I could have ever imagined. I am completely obsessed with this series and I have no idea what I'm going to do while waiting for the next novel to be

released. This series has seriously affected how I see and read other novels and trying to find one that matches the mastery of this one and hits all of those key points will definitely be a challenge! So here's hoping that the next book magically releases within the next 24 hours!! <3 <3

I'm giving it a 5 because it made me love dylan, riley, Jake, Derrick, Aaron and lexi's Boys even if the story is a trigger. Took a lot of understanding not to take it personally. I just wish it would have been cleared on the trigger warning. Anyway, Ezekiel kissing Alexis was hot dayum..!

Leigh says

Let's be honest, I love the crap out of this series. The only reason it's not a 5 is because my standards for 5s are ridiculous.

Lexie is continuing to learn about her powers (thanks!) and finding out some things that are unsettling to her (not sure how I feel about it yet. I think I'll hold off judgement till the next book), and growing in her relationships.

I appreciate the care this series takes with mental illness - it feels a little heavy handed at times, but it's an appropriate use of triggers (not making fun of people, but helping them deal with trauma. BTW, trigger warning for abuse, stalking, generally creepy things). I'm a little worried about Lexie at this point, which is definitely a plus for the book. I'm invested in the characters and the progression feels natural.

In other news, sometimes Lexie is just TOO. FLIPPING. OBLIVIOUS. I mean you're not an idiot girl, please get it together.

Sara says

In assoluto il mio preferito tra i tre!

Prima di tutto ho amato il fatto che il cattivo del romanzo non sia paranormale, ma una persona reale.

Secondo me a dato molto al libro e mi è piaciuto vedere trattare fenomeni reali come lo stalking.

Inoltre sono sempre più convinta che sia impossibile per me scegliere uno solo dei ragazzi, LI AMO TUTTI DANNAZIONE!

Al momento preferirei Alexys con Zake, che è anche il mio preferito, ma Miles è al secondo posto! Poi non posso fare a meno di amare alla follia i gemelli, Isaac e io saremmo sicuramente BFF se soltanto lui esistesse davvero.

Bene, dopo i miei infiniti sproloqui che non avranno senso per chi non avesse letto il libro, vi invito di nuovo a cominciare questa serie fantastica.

This series starts to get better for me in this book. I feel we start making some progress with the Veil and begin to shed a bit of the high school drama (just a bit). This is the book I became more invested in the characters and the world. More veil progress too. I went on to Books 4 and 5.

JadeShea says

Lexie is getting frustrated with her ex-boyfriend, and this stalker guy who can't show is face, or leave her alone. As things start to get a little crazy the guys start to step in to help her. And while she is dealing with this, she still has to try to fix the Veil, get help from a witch she doesn't trust anymore, and some more crazy stuff as well. But Lexie doesn't give up and she will do what ever it takes to make things right.

This book was awesome! I loved it. I really loved how Lexie was dealing with everything, and I loved how she was with her guys as usual. I only hope that she doesn't start dating one and exclude the others. I hope she ends up with all of them around the same time.

I was also proud of how she handled the stalker issue as well. She was so brave, and I can't wait to read the next book. It's going to be utterly amazing. And I totally adored getting to read a few of the guy's point of views, and I really can't wait till all of their feelings start to come out!

Bec says

So this barely qualifies as a paranormal, the crossing ghosts storyline seems to mostly be in the background and a stalker situation is the main focus of this book. The editing was much better, still, needs some work but I heard the author is working with a new editor for book 4. I'm still finding the story mostly entertaining and the characters interesting so I'll probably read the next book when it comes out.

Rating : a thousand stars

It's official, I love these books. And this one was my favorite so far.

- I don't see the point of ghosts anymore.
- Lexie is a mess but still fucking awesome.
- The dynamics between Lexie, Miles, Zeke, Asher, Ethan and Isaac is simply awesome and definitely one of the best in the rh world.
- Damn, Zeke has GAME.
- I want more more more more more.

- I want more of Lexie and the guys.
- But I can't help feeling anxious about the romantic stuff.
- I mean, there friendship is goals.
- So sad the book was shorter than the second, i still need my fix.
- The overprotective part of the guys is oh so loveable and endearing and kind of sexy.
- The end is heartbreaking.
- (view spoiler)
